South Bay High-Tech Firms Among Best Workplaces For Commuters

27 Santa Clara County Workplaces Make List

CA—South Bay workplaces were abundant on California's list of the Best Workplaces for Commuters, compiled by the Environmental Protection Agency and the U.S. Department of Transportation.

Of the 103 California employers that made the list, 27 are in Santa Clara County.

They include high-tech firms such as Adobe Systems in San Jose, Agilent Technologies in Santa Clara, Apple Computer in Cupertino, Cisco Systems in San Jose, Hewlett Packard in Mountain View and Juniper Networks in Sunnyvale; cities, including Palo Alto, Milpitas, Mountain View, San Jose, Santa Clara and Sunnyvale; and educational institutions, like San Jose State and Stanford universities.

The environmental and transportation coalition compiles lists of the best places for commuters to work in all 50 states. To make the list, employers must commit to helping reduce traffic and air pollution by offering their workers carpools, subsidized transit passes and other such services.

Bay City News Service is a regional, general-interest news wire service, which operates 24 hours a day gathering information from in and around the greater San Francisco Bay area. The service, which was established in 1979, has a staff of more than 20 reporters working out of nine bureaus throughout the region. Bay City News provides a real-time news report delivered directly to media organizations, Internet sites, public relations firms and government agencies. The service feeds more than 90 newsrooms via a satellite, dedicated phone line, and Internet network.
